- The first zone covers a distance up to 300 km from the gas source, the second zone is 300-1,200 km, and the third zone is beyond 1,200 km. These zonal unified tariffs will take effect from April 1, 2023.

2) India's GDP growth rate

- According to a recent report by the World Bank, India's GDP growth is predicted to slow down on April 1 to 6.3% from 6.6% in the fiscal year 2024.

- This decline is attributed to a reduction in consumption due to decreased income levels. However, experts believe that India's high level of services exports, which reached a new peak in the last quarter of 2021, will help to protect the economy from external risks since the global economy is slowing down and is expected to have a negative impact on the country's merchandise exports.
